

PRESS RELEASE

Sunhillo Corporation New Product Launch: Brigantine SGP

Sunhillo launching the next generation Surveillance Gateway Processor (SGP)

West Berlin, NJ, September 28, 2018 – Sunhillo Corporation today announced the official release of the Brigantine Surveillance Gateway Processor (SGP). The Brigantine SGP is a dedicated 1U communication platform designed to address the increasing requirements of new IP based systems for LAN to LAN surveillance sensor data formatting, content filtering, and protocol conversions.

The Brigantine will build on the success of the Sunhillo Surveillance Gateway Processor (SGP) while offering additional ports, processing capability, and the optional COM Express module expanding the Brigantine capability to new horizons. The Brigantine SGP supports twelve (12) 1Gb Ethernet Ports and two (2) Enhanced Small Form-factor Pluggable (SFP+) ports that provide up to 10Gb Ethernet over copper or single/multi-mode fiber modules.

Dave Whitman, President/CEO of Sunhillo stated; “I am very excited and proud of our new Brigantine product, it is our most powerful systems to date and will provide the platform for the next generation of surveillance processing. This is the result of three years of development and will allow Sunhillo to maintain its position as the world leader in Surveillance Data Distribution.”

For more information on the Brigantine SGP please visit www.sunhillo.com.

About Sunhillo Corporation

Sunhillo is a global leader in surveillance and flight data distribution and conversion systems. Sunhillo is an ISO9001: 2015 certified small business that handles all lifecycle aspects of surveillance data distribution systems for the Federal Aviation Administration (FAA), US Military, civil aviation authorities, and national defense organizations across the globe.
