

## Four Port Synchronous Serial Communications Adapter

### Sunhillo's PCI334A

Intelligent Synchronous WAN Communications Adapter provides four high-performance synchronous/serial channels for WAN connectivity. The adapter is ideally suited for use within radar networks, high speed modems, or other high-speed communication devices.

### Hardware Features

The PCI334A is designed as a fully programmable communications subsystem capable of sustaining high data rates for the variety of protocols that are used in synchronous data communications. The architecture of the PCI334A capitalizes on the intelligence of Motorola's MC68360 QUICC® datacomm

processor and enables it as a specialized communications controller.

The PCI334A adapter enhances overall system performance by using its on-board intelligence and large SRAM array to handle much of the low-level communications that typically burden the host system. The DSAM also eases the downloading of protocols for stand-alone code execution by relegating most of the serial I/O communications related processing to the PCI334A.

### WAN Software Support

With a well-defined application programming interface (API), Sunhillo's integrated protocol suite reduces time-to-market

## FEATURES

- **Multi-Purpose Intelligent PCI Synchronous Serial Communications Adapter**
- **Four High-Speed Ports Capable of Sustaining 2 Mbps per Port**
- **4 MB of Shared SRAM Memory**
- **Universal I/O Supporting 3.3V and 5V**
- **Support for 33 MHz and 66 MHz PCI Bus**

by eliminating unnecessary development time at the hardware/protocol level. The protocols for the standard WAN hardware products enable development engineers to proceed directly to integration and application development efforts.

A comprehensive suite of WAN communications protocols provides complete WAN connectivity solutions for Radar, TADIL-B, HDLC, and X.25 protocols. Operating system support includes Linux®, Windows®, and Solaris™.

# PCI334A: 4 Port Synchronous Serial Communications Adapter

## Technical Specifications

### Performance

- Four ports at 2 Mbps bi-directional, simultaneously, sustained 8 Mbps maximum line speed

### Processor

- 25 MHz Motorola MC68360 QUICC

### Memory

- 4 MB shared SRAM

### Bus Structure

- PCI Revision 2.2-compliant, including all PCI required configuration registers and protocols

### Physical Interface

- RS-232C/DB25 and RS-449/DB37

### Modem Control

- CTS, DSR, DTR, DCD, RTS,

### Protocol Support

- Radar, TADIL-B, HDLC, X.25, ASYNC, and SBSI

### Agency Certification

- FCC Class A
- CE
- EN60950-1

### Compliance

- All currently applicable ANSI/ISO standards
- RoHS

### Power

- RS-232: Typical 3.4 W, maximum 4.5 W
- RS-449: Typical 3.3 W, maximum 4.3 W
- V.35: Typical 5.3 W, maximum 6.9 W

### Dimensions

- 10.5 cm x 15.5 cm (4.13 in. x 6.10 in.) (short slot-compliant)

### Temperature

- Operating: 0° to 50°C (32° to 122°F)
- Non-operating: -20° to 80°C (-4° to 176°F)

### MTBF

- PT-PCI334A-11890  
487,620 hours per Bellcore Standard SR-332 Issue 1
- PT-PCI334A-11891  
341,252 hours per Bellcore Standard SR-332 Issue 1
