

Agile Capturing and Decoding Tool

Features

ECGP Decoded example

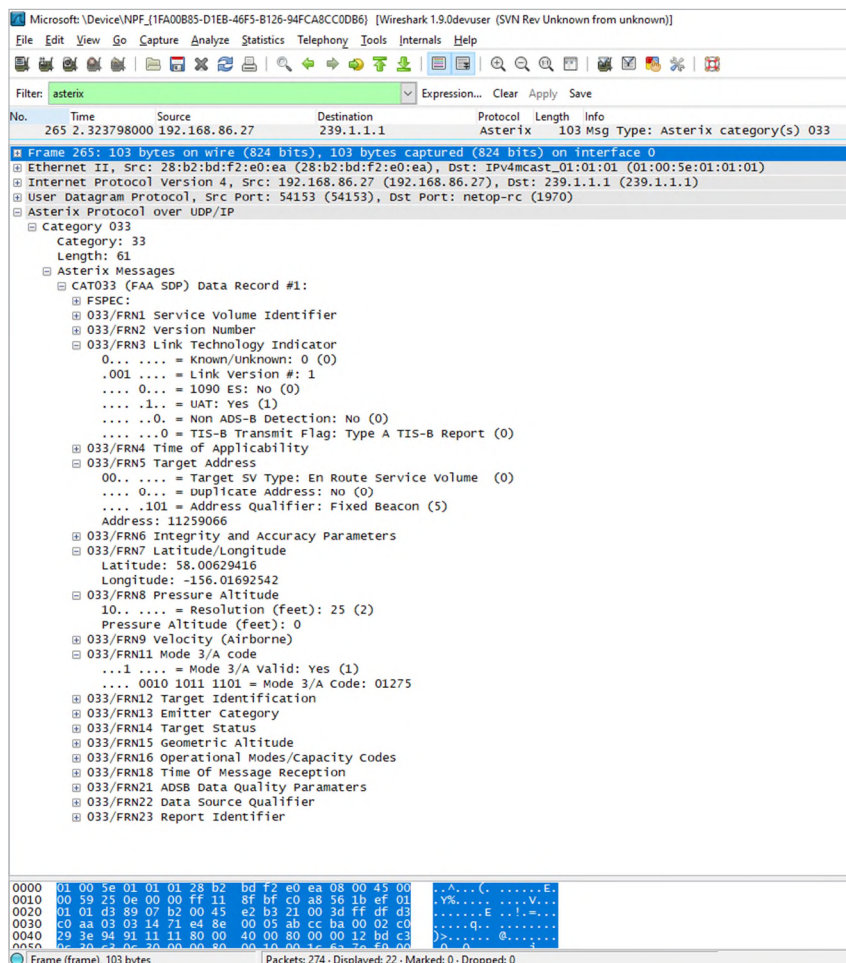

- ➔ Supports custom filters for ECGP and ASTERIX formats
- ➔ Supports ECGP message formats such as CD-2, ASR-9, and MAR
- ➔ Offers Statistical information for specific ECGP and ASTERIX formats
- ➔ Supports multiple ASTERIX formats

Sunhillo's Wireshark ASTERIX Tool Kit is a powerful Windows driven application formulated for capturing and decoding state-of-the-art and legacy surveillance radar formats for analysis.

The ASTERIX Tool Kit gives you the ability to break out individual fields and their corresponding values utilizing the Wireshark application in an effortless and intuitive approach.

ASR-11 and ASTERIX formats supported:

- ➔ ASR-11 CAT001/002
- ➔ CAT001/002
- ➔ CAT034/048
- ➔ CAT021
- ➔ FAA CAT023/033
- ➔ CAT062
