- Telecommuting: Hybrid
- U.S. Citizenship

Job Summary

Sunhillo is looking for a Senior Test Engineer to bring value and expand its growing Test Engineering department. This position will have a focus on low-level testing of software implementation and physical products used in domestic and international air traffic communication markets. The Senior Test Engineer position is a strategic, hands-on engineering role responsible for detailed test creation and execution to validate software and products to a strict set of requirements.

Required Experience & Skills:

- 5+ Years Test Engineering Experience
- Fluent in Microsoft Office 365, Visio
- Writing formal test procedures and informal work instructions
- Creating system diagrams
- Data reduction and analysis
- Serial and Network Communication testing and analysis
- Proficiency in Linux and Windows
- Linux experience at the command line level (write/run scripts, change IP addresses; bash shell scripting a plus); familiar with UBUNTU and embedded Linux a plus
- Networking experience (ability to set up local area networks for test environments)
- Ability to learn and adapt to new test tools quickly.
- Familiarity with one or more of the following: Wireshark, TestComplete and IBM DOORS.

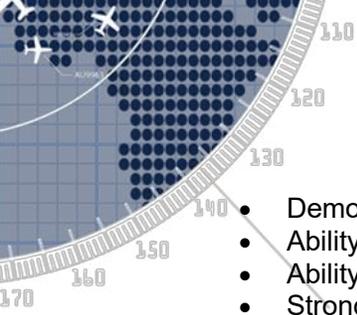

444 Kelley Drive, West Berlin, NJ 08091-9210, USA
